#### 4) Lock:

To avoid any mis-operation and ensure safety of children. Press this button for 3s to enable the

function, the indicator will light. All buttons are disabled except Child Lock and power key.

#### 5) Booster:

Activate Booster = Select first the cooking zone and then press Booster, now the Booster will be activated and the power display will show [P];

Deactivate Booster = Select first the cooking zone and then press booster, now the Booster will be deactivated, and the power display will return to previous power level.

#### 6) Power Sharing and number equivalents:

The Invisacook unit is a shared power device. By sharing the power requirements within the four burners, this keeps the Invisacook unit very efficient and will require less than 25 amps with all four burners activated at once.

The Invisacook unit will operate under the following power selected parameters:

Once you have activated the Power Boost on either the left side or the right side of the unit, a maximum of power level

8 (eight) can be attained on the same side ONLY while that power boost is on.

A maximum of power level 8 (eight) and 6 (six), without the Power Boost, on each side independently can be attained using all four burners at once. The unit will automatically change to its respective power levels when all four burners are used simultaneously.

#### 7) Timer:

You can set the time max to 99minutes and this button can be activated only when burner is working. Press 0-9 keys to set timer.

## 4) Smart Functions:
